

NeXplore Corporation Transitions Newly Acquired ClickCaster.com to NeXplore Grid Server

NeXplore Leverages Grid Layer from Layered Technologies for Fast Integration, Speedy Launch, Instant Scalability

FRISCO, TX — June 5, 2008 — NeXplore Corporation (OTC: NXPC) today announced the successful transitioning of the recently acquired ClickCaster.com website to the NeXplore Grid Server. Powered by The Grid Layer hosting solution from Layered Technologies, in combination with 3Tera Inc.'s virtualization software AppLogic, the NeXplore Grid Server is the company's virtual private data center for efficiently and cost-effectively operating and managing NeXplore's growing portfolio of Web 2.0 products and destinations.

The rapid transitioning to the NeXplore Grid Server of ClickCaster.com enables NeXplore to quickly monetize and scale this popular website that provides tools for fast-and-easy audio and video podcast creation, publishing and management. ClickCaster.com currently has approximately 245,000 unique users, a number NeXplore plans to quadruple by the end of 2008.

NeXplore currently utilizes the NeXplore Grid Server to host and manage NeXplore Search, the company's recently launched Web 2.0 search engine optimized for a superior end-user experience, rich-media display and social network integration. NeXplore is working to integrate ClickCaster.com podcasting capability into NeXplore Search.

"The quickness, low cost and relative ease with which we were able to transition ClickCaster.com to the NeXplore Grid Server validates our decision to utilize this cutting edge hosting and application management system," said Dion Hinchcliffe, chief technology officer for NeXplore Corporation. "The pace of innovation today is blistering. Web companies hobbled by the cost and complexity associated with traditional infrastructure — datacenter co-location, private racks and managed hosting services, etc. — are destined for extinction. The road to success in today's dynamic Web 2.0 world — the path that NeXplore is forging — is paved with glitch-free performance, speed-to-market and instant, on-demand scalability."

About NeXplore Corporation
